

AKASH PANDEY (React.js Developer | Front-end Engineer)

✉ pandeyaakash7491@gmail.com ☎ 8957447491 LinkedIn: www.linkedin.com/in/akash-pandey-6960842b1/

PROFILE SUMMARY

Front-end Developer with 1+ year of experience building scalable, high-performance web applications using React.js, JavaScript (ES6+), and modern frontend architecture. Experienced in developing admin dashboards, real-time tracking interfaces, multilingual applications (22+ languages), and map-based systems using Leaflet.js. Strong expertise in state management (Redux, Context API), REST API integration, and performance optimization. Passionate about building clean, reusable, and production-ready UI components.

PROFESSIONAL EXPERIENCE

Cowberry — (React.js Developer)

July 2025 – Present | Surat

- Developed and maintained a React.js-based location tracking web application for real-time employee monitoring, task assignment, and activity log management.
- Designed and implemented a responsive admin dashboard featuring map-based live tracking, role-based access, and full CRUD operations for employee and task management.
- Implemented multi-language (i18n) support for 22 Indian languages and a theme customization system, improving accessibility and user experience.
- Integrated RESTful and real-time APIs in collaboration with backend developers to ensure efficient data synchronization and application stability.
- Utilized Redux and Context API for state management and followed component-based architecture for scalable and maintainable code.
- Improved application performance by reducing unnecessary re-renders and implementing reusable component architecture.
- Ensured cross-browser compatibility and mobile responsiveness using HTML, CSS, and modern JavaScript (ES6+).

GvClouds Secure, (Front-end developer intern)

Sep 2024 – feb 2025 | Noida

- Assisted in designing and developing responsive web applications using HTML, CSS, and JavaScript.
- Collaborated with the design team to implement user-friendly interfaces and improve user experience.
- Debugged and optimized existing code for performance and compatibility across devices and browsers.
- Mastered version control systems using Git, managing code changes for a Front-end development team and ensuring streamlined collaboration.

PROJECTS

LANTERN360 – Workforce Management & Employee Performance Platform- lantern360.in

Developed the complete frontend of a workforce management and employee tracking platform, delivering 360-degree visibility into attendance, GPS tracking, and leave workflows through a responsive and performance-optimized web interface.

- Built interactive dashboards for employee attendance, task management, and performance monitoring
- Implemented real-time GPS-based attendance tracking with route visualization using Leaflet.js

polyline mapping.

- Developed leave management UI with employee leave application and manager/HR approval workflows.
- Integrated RESTful and real-time APIs for seamless data synchronization between frontend and backend systems.
- Implemented role-based UI rendering (Admin, HR, Manager, Employee) on the frontend.
- Designed reusable, scalable components using modern React patterns and state management.
- Improved UI responsiveness and reduced unnecessary map re-renders while rendering live GPS polyline routes.
- Developed fully responsive UI using React.js and Tailwind CSS with performance optimization and efficient rendering.
- **Tech Stack:** React.js, Redux / Context API, REST APIs, Tailwind CSS

E-COMMERCE WEBSITE | [GitHub](#)

- Developed a responsive e-commerce web application using **React.js, HTML, CSS, and JavaScript**.
- Implemented features including **cart functionality, user authentication, and order management**.
- Integrated **RESTful APIs** for dynamic data handling and ensured cross-browser compatibility.
- Improved performance using **lazy loading, code splitting, and caching techniques**.

Tech Stack: HTML, CSS, JavaScript, React.js

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js

State Management: Redux, Context API

Styling: Tailwind CSS, Bootstrap

Tools: Git, GitHub

Concepts: REST APIs, Responsive Design, Performance Optimization, Component Architecture, UI/UX

EDUCATION

Master's degree (M.Sc.) (2023-25)

Siddharth University

Bachelor of science (B.Sc.) (2019-22)

Deen Dayal Upadhyaya (DDU) Gorakhpur University

Class XII (Good Shepherd English School)

GSEB (Gujarat Board) -(2019)

Class X (Good Shepherd English School)

GSEB (Gujarat Board) - (2017)

CERTIFICATES

Front-End Developer Certification —

Jan2024 – Jun 2024 Uncodemy, Noida

Completed a 6-month Front-End Bootcamp with a focus on React.js.
